Instructions	Worked / Appropriate	
First Impression From launching the system please note your comments on - without prompts from others	Purpose? Audience? Do you really know why you are here?	The first impression is good and simple website working fine. The purpose is to save coral reef and detailing about threats relating to it. The audience is children and the according to the website it's quite difficult to gain more about the user. To check for the information related to coral reef and saving coral reefs.
Current Iteration Persona **User Journey** **Data** **Security** **Other** **Any errors?**	Do you think this is appropriate? Rate their UX Good / Fair / Needs improvement Appropriate for target audience, not overly complex but sufficiently interesting. Are their ACTIONS to before? Not just information? If data is in application - Does this add value to their project? Could they have done more with the data they have? Is it secure? Any encryption needed but not used Does the technology fit with the needs and	User interface is complex with too much words and information. 7/10 Fair UI needs improvement on the part words on texts and detailing of the words. User journey is appropriate. Just too much wordy and informative. The data in the application adds value. The have fairy done with the data. The website is secured. The technology is good but for the target audience it's bit too complex.

Any other feedback?	desires of problem and audience?	No errors found on the website. Too lessen the words and provide more interactive features to make user interested in surfing through the website.
